Customer Service Standards

We believe it is important that customers should know what level of service they can expect from the Patent Office. Our specific standards, which have been drawn up in consultation with customers and staff, cover the major transactions carried out by each operational area of the Office. These standards are reviewed periodically to see if service levels can be improved upon.

Our guiding principles are that you may expect to:

- be treated fairly;
- be treated courteously; and
- get help from us with your application.

To achieve this we aim to:

- publish details of all the applications for Intellectual Property Rights (IPR) we accept, and publish major decisions which lay down new principles or reinforce existing ones for the grant and protection of IPR;
- always explain and give reasons for our decisions and give you the chance to challenge them;
- be positive and helpful to you; and
- staff our enquiry points from 09:00 to 17:00.

The standards are set out below. The standards and the performance against them are published in the first journal of each month.

Patents

1. Issue formal filing receipts for correctly filed new applications within 3 working days of receipt.
2. Issue patent search reports or combined search and examination reports on average within 3 months of receipt of the request.
3. In all cases publish the full search report when patent applications are first published.
4. Respond to requests for accelerated examination by issuing the examination report within 8 weeks of receipt of the request.
5. Issue certified copies of patent documents for use abroad within 10 working days of receipt.
6. Confirm payment of patent renewal fees within 4 working days of receipt.
7. Issue assignment reports within 4 weeks of application.

Notices - cont**Designs**

1. Issue formal filing receipts for correctly filed design applications within 6 working days of receipt.
2. Issue initial examination reports on design applications within 8 weeks of receipt of the request.
3. Respond to detailed correspondence on individual applications within 4 weeks of receipt.
4. Issue 70% of Design Registration Certificates within 6 months of receipt of application.
5. Confirm payment of design registration renewal fees within 6 working days of receipt.
6. Respond to assignment and licence applications within 15 working days of receipt.

Trade Marks

1. Issue formal filing receipts for correctly filed new applications and application deficiency letters (where appropriate) within 6 working days.
2. To issue the substantive examination reports within 2 months of application.
3. Issue formal statements of grounds arising from *ex parte* refusals within 3 months of the request.
4. Advertise the trade mark in the Trade Marks Journal within 5 weeks of the application being made ready for advertisement.
5. Respond to all detailed examination correspondence on individual applications within 4 weeks.
6. Issue reports on all registrable transactions within 5 weeks of filing.
7. Issue certified copies of extracts from the Trade Marks Register within 7 working days of application.
8. Issue trade mark renewal certificates within 6 working days of receipt of properly filed renewal applications.

Copyright Directorate

1. Answer telephone calls within 3 rings.
2. Deal with requests for information within 1 working day.
3. Answer correspondence of general enquiry within 5 working days.
4. Answer e-mails of general enquiry within 1 working day.

Search and Advisory

1. To meet requests within the timescale agreed with the customer; otherwise standard requests will be met within 10 working days.
2. To see visitors within 10 minutes of any appointment made at the Office.

Notices - cont**Central Enquiry Unit**

1. Answer telephone calls within 3 rings.
2. Deal with requests for leaflets and forms (copyright, designs, patents and trade marks) within 1 working day.
3. Answer correspondence of general enquiry within 5 working days.
4. Answer e-mails of general enquiry within 1 working day.
5. To see visitors (trade mark searches) within 10 minutes of any appointment made at the Office.

Finance Section

1. Pay bills within 30 days of receipt of goods or services or a valid invoice, whichever is the later.

Sales

1. Dispatch orders for publications within 1 working day of request.

Complaints Procedure

The Patent Office is committed to providing high quality best value services.

If things go wrong we want to know.

If you wish to complain about the quality of service you have received from us and cannot resolve the problem with the person you have been dealing with or his/her manager, please write to:

Notices - cont

Alison Brimelow
Chief Executive
The Patent Office
PO Box 49
Cardiff Road
Newport
South Wales

e-mail: box49@patent.gov.uk

Your complaint will be acknowledged within one working day and you will receive a full reply within 10 working days. If, in exceptional circumstances, we cannot meet this target, we will explain why and give you a new deadline.

If you have followed this procedure and are still not satisfied, you have the right to ask your MP to take up your complaint and our handling of it with the Parliamentary Commissioner for Administration (the "Ombudsman"). Your local Citizen's Advice Bureau will give you the address of your MP. You may get further advice from the Ombudsman's office at:

The Office has developed a leaflet detailing all aspects of its complaints procedure: copies can be obtained by phoning our Central Enquiry Unit on 08459 500505.

National Security

Attention is drawn to the provisions of section 23 of the Patents Act 1977 which provides that no application for a patent for ANY invention may be made abroad by a person resident in the United Kingdom, without permission from the comptroller, unless application for a patent for the same invention has first been made in the United Kingdom, and six weeks have elapsed from the date of such application and no directions prohibiting publication or communication have been given or all such directions have been cancelled. Requests for permission from the comptroller to make an application abroad should be made even if for example such an application is required by contract with a foreign firm. Requests will be facilitated by explicitly addressing them "For attention in Room G.R70".

Normally the written authority required by section 23 will be posted from Newport on the same day that the request is received. If this degree of urgency does not suffice a telephone enquiry should first be made to +44(0)1633 813558.

Proceedings under the Patents Act 1977

Applications for Patents Filed

Application Number Range

GB0024925.0 - GB0025552.1

This index sets out details of applications for patents filed in the application number range given above. The entries are arranged in alphabetical order according to the applicant's name. Where there are joint applicants, then the entry under the name of the first applicant sets out details of the application, including the names of the other applicants. The entries under the names of the other applicants are cross referenced to the entry for the first applicant.

Each entry in the index under the name of the (or the first) applicant provides the following information: the name(s) of the applicant(s); the title of the invention; the filing date of the application; any priority details; and the application number allotted to the application.

Where an application is requesting an early date under Section 8, 12,15(4), or 37 of the Act, then the filing date of the earlier application is included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European Patent Application, then the application number, the publication number, and the date of filing of the PCT or EP application are included (see example 3).

The application number includes, at its end, a check digit. The full application number, including the check digit, should be quoted in all correspondence concerning proceedings in respect of an application up to the grant of a patent. When the application is published under Section 16(1) of the Act, it will be accorded to a seven-figure serial number. This should be used only when seeking to identify printed copies of the specification and its abstract and to make enquiries concerning entries in the Register of Patents.

These applications will not be available to the public for inspection or purchase until the date of publication under Section 16(1) of the Act. This date will be advertised in a subsequent issue of this Journal.

There follows three examples of entries for this index. The first example shows an entry under the name of the first applicant for an application having joint applicants, and includes an entry under the name of one of the other applicants. The second example shows an entry for a divisional application and includes priority details. The third example shows an application derived from a PCT application.

Applications published : Subject-Matter Index

GB2350271 - GB2350538

This index sets out details of applications in the above number range which are published under Section 16(1) as from the date of publication of this issue of the Journal. Printed copies of the applications, together with the front pages containing their abstracts and bibliographic and classification data, and copies of search report under section 17, are now available at £2.67 per copy (including postage) from The Patent Office (Sales), Concept House, Cardiff Road, Newport, South Wales NP10 8QQ. These items are also available, but for a limited period only, to personal callers at Harmsworth House, 13-15 Bouverie Street, London EC4Y 8DP

The index also includes applications in the above number range derived from applications under the Patent Cooperation Treaty (PCT) which have entered the UK national phase. Printed copies of the front page of these applications are similarly available together with English translations of those applications published under the PCT in a language other than English.

Each entry in the index provides the following information: the publication number; the application number; the date on which the application was filed at the Office; the name(s) of the applicant(s) and the country of incorporation; the abstract title; any priority details; the United Kingdom Classification Heading(s) assigned to the application; and the International Patent Classification assigned to the application.

Where an application is requesting an early date under Section 8, 12, 15(4), or 37 of the Act, then the application number and the date of filing of the earlier application are included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European Patent application, then the application number, the date of filing, the publication number and the date of publication of the PCT or EP application are included (see example 3).

In the index, the entries are grouped in ascending publication number order according to the UK Classification Headings. The UK Heading is given at the beginning of each group. Where an application has been classified in a supplementary (or secondary) Heading, then the entry under the primary Heading includes details of the application and the entry under the supplementary Heading is in the form of a cross reference to the primary Heading (see example 4).

The publication number is the seven figure number given to an application when it is published and by which it will be recorded on the Register of Patents. Printed copies of each application will also be identified by the publication number, followed by the document type "A". This identification should be quoted in full when ordering copies. However, for all proceedings up to grant of a patent, the application number originally assigned should be used.

There follows four examples of entries for this index. The first does not include any information on priorities, earlier applications, or PCT or EP applications. The second and third include priority information. In addition, the second includes information carried

for a divisional application, and the third includes information carried for an application derived from a PCT application. The fourth example shows an entry under a supplementary Heading.

Applications published: Name Index

This index lists, in alphabetical order, the names of applicants and inventors for the applications the publication of which is announced in this issue of the Journal. The entry under the name of the applicant sets out the details of the application including the name of any inventor who is not also an applicant. Where an inventor is also an applicant, the name appears in the index only as an applicant. Where there are joint applicants, details of the application are given only for the entry under the name of a first applicant, the entries under the names of the other applicants being cross referenced to the entry for the first applicant. Where an inventor is not also an applicant, the entry under the name of the inventor is cross referenced to the entry of the applicant, or the first applicant in the case of joint applicants.

Each entry under the name of the (or the first) applicant provides the following information: the name(s) of the applicant(s); the country of incorporation; the names of inventors who are not also applicants; the UK Classification Headings accorded to the

application; and the publication number of the application. There follows three examples of entries for this index. The first example shows the entry for an application having two joint applicants and an inventor who is not also an applicant, the second shows the entry for the other applicant.

Patents granted: Number Index

Patents whose grant is indicated in the index below take effect for the purposes of all provisions of the Act subsequent to Section 25(1) as from the date of publication of this issue of the Journal. Printed copies of the corresponding specifications of the patents identified by the publication number listed, and followed by the letter "B", are now available for sale at £4.04 per copy (including postage). These items are available from The Patent Office (Sales), Concept House, Cardiff Road, Newport, South Wales NP10 8QQ and, for a limited period only, to personal callers at Harmsworth House, 13-15 Bouverie Street, London EC4Y 8DP.

This index lists the granted patents in ascending publication number order. Each entry in the index provides the following information: the publication number; the application number; the date on which the application was filed at the Office; the name(s) of the proprietor(s) and the country of incorporation; the name(s) of the inventor(s); the title of the invention; any priority details; the United Kingdom Classification Heading(s) assigned to the application; and the International Patent Classification assigned to the application.

Where an application is requesting an early date under Section 8, 12, 15(4), or 37 of the Act, then the application number and date of filing the earlier application are included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European patent application, then the application number, the date of filing, the publication number, and the date of publication of the PCT or EP application are included (see example 3).

There follows three examples of entries for this index. The first does not include any information on priorities, earlier applications, or PCT or EP applications. The second and third include priority information. In addition, the second includes information carried for a divisional application, and the third includes information carried for an application derived from a PCT application.

Patents granted: Name Index

This index lists, in alphabetical order, the names of proprietors and inventors for patents whose grant is announced in this issue of the Journal. The entry under the name of the proprietor sets out the details of the patent including the name of any inventor who is not also a proprietor. Where an inventor is also a proprietor, the name appears in the index only as a proprietor. Where there are joint proprietors, details of the patent are given only for the entry under the name of a first proprietor, the entries under the names of the other proprietors being cross referenced to the entry for the first proprietor. Where an inventor is not also a proprietor, then the entry under the name of the inventor is cross referenced to the entry for the proprietor, or the first proprietor in the case of joint proprietors.

Each entry under the name of the (or the first) proprietor provides the following information: the name(s) of the proprietor(s); the country of incorporation; the names of inventors who are not also proprietors; the UK Classification Headings accorded to the patent; and the publication number of the patent.

There follows three examples of entries in this index. The first example illustrates the case where there is a single proprietor who is also the inventor. The second example illustrates the case where there is a single proprietor and an inventor who is not also a proprietor, and includes the entry for the inventor. The third example illustrates the case where there are joint proprietors and an inventor who is not also a proprietor, and includes the entries for the other proprietors and the inventor.

European Patents granted

Grants mentioned in EPO Bulletin No 00/48 dated 29 November 2000

This index lists, in ascending publication number order, European patents designating the United Kingdom as a Contracting State, which have been granted under Article 97 of the European Patent Convention as of the date of the EPO Bulletin mentioned above. For each entry in this index, the first item is the publication number of the European application and the second item is the application number. The item (NOT ENGLISH) is used to indicate when the language of publication is French or German, and the last item is the name(s) of the proprietor(s). For patents having a publication language of French or German, an English translation must be filed if the patent is to continue to be effective in the UK.

There follows an example of an entry for this index.

Translations filed: European Patents

This index lists European Patents designating the United Kingdom as a Contracting State, for which a translation has been filed under Section 77(6)(a). The entries are arranged in blocks in order of date on which the filing of the translation was entered in the Register. Within each block, the entries are arranged in ascending publication number order with the application number, the date on which grant took effect in the UK, and the name of the proprietor given against each publication number.

There follows an example of an entry in the index.

European Patents void

This index lists European Patents designating the United Kingdom as a Contracting State, which were published in French or German and for which an English translation has not been filed within the period prescribed by the Patents Rules. In accordance with Section 77(7), they are therefore treated as always having been void. The patents are listed in ascending publication number order. Against each publication number is the corresponding application number and the date of the European Bulletin in which grant by the EPO was announced.

There follows an example of an entry in the index.

Proceedings under EC Regulations 1768/92 and 1610/96 (Supplementary Protection Certificates for Medicinal Products and Plant Protection Products, respectively)

These entries include details of all proceedings relating to Supplementary Protection Certificates. Applications for Supplementary Protection Certificates are numbered in a single yearly sequence commencing SPC/GB93/001 covering both medicinal and plant protection products and the same number is retained for the granted certificate. Proceedings are open to public inspection but the granted certificate is not separately published.

The entries are grouped in categories according to the type of proceedings. Within each category the entries are arranged in alphabetical order according to the name of the applicant for, or holder of, the certificate and provide the following information; the name and address of the applicant or holder; the product in respect of which the certificate has been applied for or granted; the product type; ie. "Medicinal" or "Plant Protection"; the number and date of the first authorisation under Directive 65/65/EEC or Directive 81/851/EEC to place the product on the market as a medicinal product in the United Kingdom or the number and date of the first authorisation under Article 4 of Directive 91/414/EEC or an equivalent provision of national law to place the product on the market as a plant protection product in the United Kingdom; where relevant, the country; number and date of the first authorisation to place the product on the market in the European Community; the number and title of the basic UK patent or European patent (UK) which protects the product; and the number of the application or certificate.

The entries will also state as appropriate: the filing date of the application; the date of grant or rejection of the application; the maximum period of the granted certificate; the effective period of the certificate on entry into force; and the date of lapse or invalidity of the certificate.

There follows three examples of entries under these proceedings. The first relates to a new application for a certificate based on a European patent designating the United Kingdom and having first authorisation of the product in the United Kingdom. The second example relates to a certificate granted based, once again, on a European patent designating the United Kingdom but with the first product authorisation in the EEC in Denmark. The third refers to a certificate entering into force based on a United Kingdom patent with first product authorisation in the EEC in Belgium.

Certificates of Registration issued

Week Ending 08 November 2000

The details of designs in this list as well as previously registered designs, are open to public inspection, details of which may be inspected without provision of a copy, free of charge at The Patent Office, Designs Registry, Newport, South Wales NP10 8QQ or at the London Front Office at Harmsworth House, 13-15 Bouverie St, London EC4Y 8DP.

Copies of the Designs Register entry and representations of the registered design may be obtained from the date on which the Certificate of Registration is issued (Grant Date), on payment of a fee of £5. Photographic copies, where reproduction is from a large or coloured specimen or a photograph that will not effectively photocopy, may be obtainable exceptionally at market price.

Alternatively the Register of Designs and registered representations may be inspected on The Patent Office web site at:

<http://www.patent.gov.uk>

Clicking on the Database Services button on the home page will display services available of which the following relate to Designs.

Design Status Information Service

Displays the Register entry for each design number input.

Designs Image Search Service

Displays all registered representations and a brief register extract for each registered design. Designs can be searched and examined by proprietor, classification or design number.

No fee is charged for the use of either of the above database services.
