

# 2014 Release 3 NEWS

## FOCUS ON RELIABILITY & SIMPLICITY

In this release we have focused on making the software more reliable. Of course there are also new product development implemented. The software application is made to run quicker and to work smoother.

## ISU - Intelligent System Update

The automatic online update feature in the Diagnostic software is used more from now on. Previously it has mainly been used to push security updates and fixes. Now we are looking forward to supply you enhanced user functionality and increased database content along the way to the next software release. In this way you can have faster access to our development. Just make sure your computer is online, connected to internet, and you will continuously get the latest functions and data!

## A DATABASE WITH EDGE

The CARS and TRUCKS databases have many features and functions for a wide range of vehicles. Use the Information View - Vehicle selection in the software to find an overview of each vehicle's diagnostic functionalities. If you have had the diagnostic tool for some time, please check the latest range of adapter cables available to improve your work potential. Please contact your nearest dealer to find out the latest news in the diagnostic product range!

## GUIDE

Brand

Model	Year Range	Engine	Brake	Instrument	AC	Gearbox	Immobiliser	Restraints	Multifunction	Service
Model	2004-2007	●	●	●	●			●	●	●
Adjustments	2004-2006	●	●							
Programmings and tests	2006-2007								●	

Brand and Models are listed as in the CARS and TRUCKS software.

Year range in model includes a complete range for all systems with new or updated functionality.

The OBD functions e.g. Adjustments and Programmings that are listed are new or updated for the marked system.

Systems with markers are new or updated with read/erase fault codes, real time data and/or activations.
